

The History

of Atomes . . .

Atomes is a Canadian company founded in 1999 by a team of scientists. These professional industrial chemists and Microbiologists have applied their technical knowledge and expertise to the development of products that satisfy the growing needs of public hygiene. They believed that more stringent methods of sanitation control would improve public health protection. Atomes' founders successfully laid the foundations of a dynamic company, an innovator in the field of hygienic products and related services.

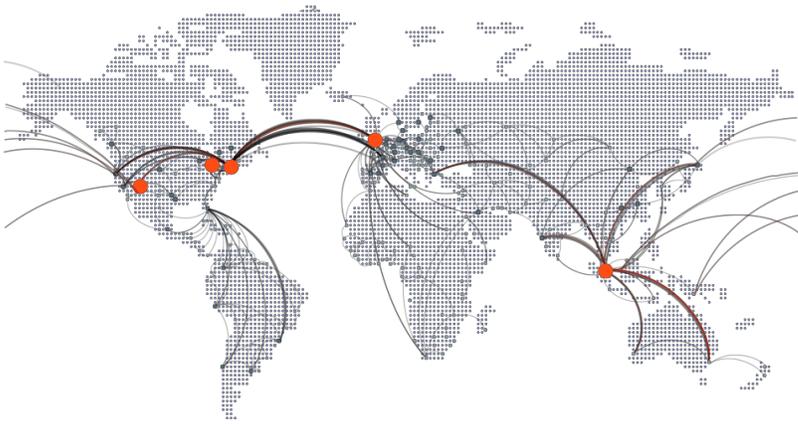

Atomes is a dynamic, enthusiastic and professional company that focuses on a single goal: to continuously improve the quality of the environment where our fellow citizens live, work, play, study and receive medical care, with a view to pushing back the frontiers of longevity while respecting the environment.

From its earliest beginnings in research, manufacturing and marketing specialty chemicals for food-processing establishments, Atomes has remained committed to its original philosophy: "***solution provider through innovation***".

With a team of scientists supported by their staff, Atomes

- Develops and manufactures more than 200 chemical and biotechnological specialties for commercial, industrial and institutional markets.
- Develops and manufactures basic chemical surfactants and emulsions, as well as non-pathogenic strains for biotechnological applications.

Today, the company is a leader in the chemical and biotechnological hygiene products industry. On the strength of its competent scientists, Atomes offers unparalleled hygiene products and an outstanding ability to meet new challenges.

To better meet

Your needs »

Research and development at Atomes is the primary activity of the firm. Atomes commitment and contribution in advanced technology research has elevated the firm R&D partners of the following private and government institutions:

Every year without exception, Atomes registers several breakthroughs, adding more patents to its already impressive list of **“unique-patented”** products. In this respect, Atomes has succeeded in developing eco-friendly products all-while being extremely effective and economic. This is in part due to the highly-concentrated nature, multi-active ingredient and unique formula composition that allow multi-purpose applications by the same product.

Quality Control at Atomes is a permanent process aimed at positioning the company above the standards of the industry with respect to formulation, manufacturing, distribution and after-sales service. All aspects of product design, ranging from raw materials to commercialization, are rigorously controlled in order to exceed the prevailing technical standards, attain superior application performance, abide by current regulations and fulfill Atomes environment mission.

*« At your disposal
for finding
solutions adapted
to your needs »*

Our team consists of highly-trained doctors, engineers, and technicians having substantial hands-on experience and operating within a framework of professionalism, integrity, and goal-oriented management. Our team and our advanced information technology infrastructure (Laubrass.com) constitute the backbone of our added-value sales and after-sale (technical support) services.

Atomes supports **Green Chemistry**. Its products are **exclusively biodegradable, environment friendly, non-toxic, non-corrosive, non-harsh and safe to handle.**

Our products carry a number of certifications and approvals such as, **Drug Establishment License (GMP), Drug Identification Number (DIN), Health of Canada, Agriculture Of Canada, Canadian Food Inspection Agency CFIA, Pesticide Permit EPA, Ministère du Développement durable, Environnement et Parcs – Québec, Eco Seal, EcoLogo, and etc.**

A variety of markets . . .

In partnership with prestigious universities and research centres, Atomes can thus fully realize its mission of innovation. The pace of development and continuous improvement of its products allows Atomes to rapidly renew its product lines and thus maintain a major technological edge.

For example, Atomes has approved more than 60 new products from Health Canada and Agriculture Canada (Canadian Food Inspection Agency) over the past four years. The reputation of Atomes in innovation and solution-providing has attracted many customers even at the governmental level. The Canadian Food Research and Development Center "CRDA; Fondation des Gouverneurs" approached the Chief Chemist at Atomes to give seminars on sanitation, methods and alternatives, new biotechnological compounds, etc.

« Our expertise

In many

Industry sectors »
